

Additional production space available

Additional production space available

With our continual goal of expanding our business and providing exceptional service to our customers, Precision Cable Assemblies has expanded its manufacturing space by 20,000 sq. ft.

With our sister company, Badger Wire, moving into its own facility we have been able to pick up the space they occupied to expand our production needs.

The additional space will allow us to expand our shipping/receiving area and provide a better product flow utilizing the cell concept. This will result in increased efficiency and productivity along with better control over our inventory.

We look forward to better serving our customers through our continued efforts to improve our production flow and capabilities.
