

Battery Cable / Ground Straps

We make both Lead Cast and standard ring-terminated battery cables. We have the ability to tin-coat terminals after application to reduce the possibility of corrosion and increase conductivity. Lead Cast Battery Cables are custom made and can come with or without the nut and bolt. A variety of boots are available to fit over both Lead Cast and Ring Terminals.

Ground Straps are offered jacketed or non-jacketed. Many of our terminals are stamped locally. Lead Cast ends and boots are also available on Ground Straps.

Key Benefits

- High Quality
- Battery Cable produced in-house
- Tin-dipping available to reduce corrosion and increase conductivity

Applications

Made to fit your automotive, marine, lawn & garden and power distribution needs.
