

Custom Molded Assemblies

PCA utilizes injection molding equipment to provide molded cable assemblies that have the advantage of durability, customization and aesthetics. These products can provide a water tight seal at connection points. Our molding capabilities range from single pin / receptacle molds to multi-conductor molds. While we can provide anything within this range, we are also able to customize our molds to meet your needs.

Key Benefits

- High Quality
- In House Wire and Cable
- Creates Water Tight Seal

Applications

Snowplow headlight adapter assemblies, rear-sill trailer lighting, lawn and garden tractor assemblies.
